DETAILED ILLUSTRATION

GENERAL:

1. Before starting the installation, make sure all electricity has been turned off and electrical breaker has been locked out and tagged out.
2. To ensure the success of the installation, be sure to read these instructions and review the diagrams thoroughly before beginning.
3. All electrical connections must be in accordance with local codes, ordinances, or the National Electrical Code.
4. These fixtures are intended to be mounted to a J-Box directly supported by the building structure.

NOTE: The important safeguards and instructions appearing in this manual are not meant to cover all possible conditions and situations that may occur.

INSTALLATION

1. Remove Star Drive Mounting Plate screw at the ends of the fixture.

IMPORTANT: Only remove base screws as shown. **See Fig. A**

2. Mount back plate to single gang J-Box and pass wiring from fixture through center hole on Mounting Plate to make code approved wiring connections at J-Box.

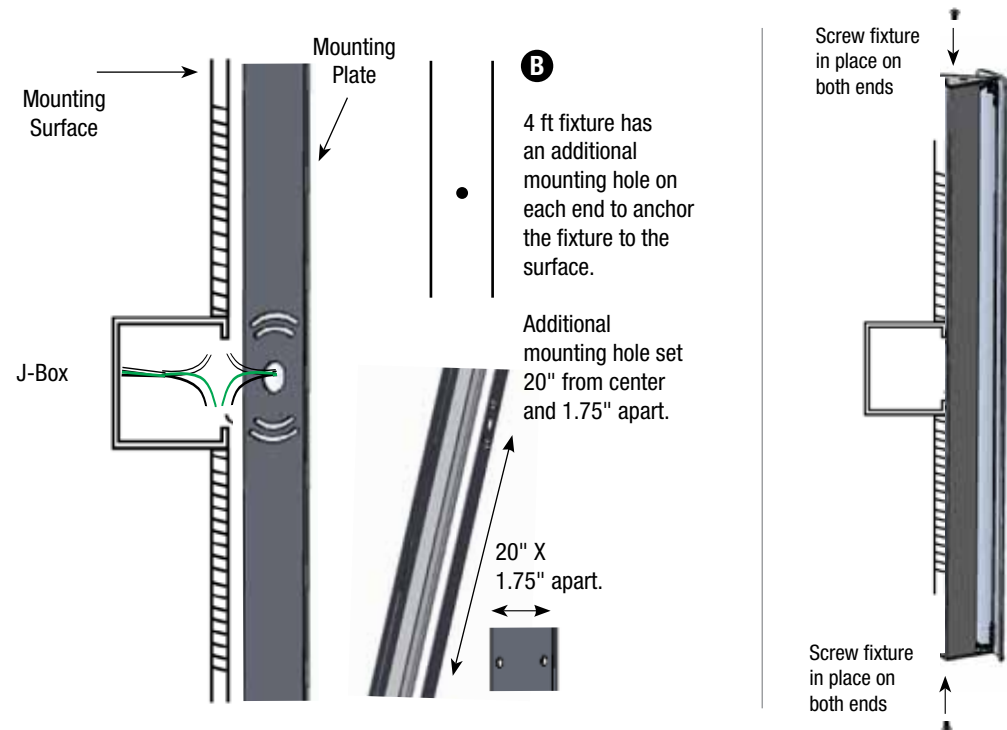

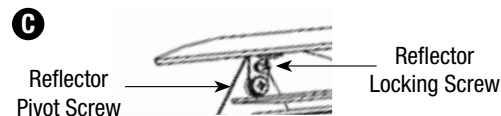

NOTE: Fasten Mounting Plate to single gang J-Box using proper J-Box screws.

IMPORTANT: Interior Locations Only

3. Ensure that Fixture is level before finally tightening. Use additional anchors to secure Fixture Housing to mounting surface.

NOTE: For 4ft fixture only: Requires 2 additional mounting screws (1 on each end). **See Fig. B**

4. Replace fixture to Mounting Plate using Star Drive Screws at both ends.
5. Make reflector adjustment using reflector pivot screws (one on each end). **See Fig. C**
6. Loosen Pivot Screws and adjust to desired position.
7. Tighten Pivot Screws and Lock in place by tightening Reflector Locking Screws at each end.
8. Restore power and test fixture. If fixture does not turn on, disconnect power before checking for problems.
